

Step into the light.

INTEGRAL SENSOR

One of our most flexible fittings

- Integral Microwave and Daylight Sensor ensures the fitting only comes on when insufficient light **and** movement are detected
- STEP Dimming function - 0, 10 or 30%
- Dual Wattage driver lets you choose the power setting (30W/50W or 35W/60W) at the time of installation
- Self Test Emergency or non-Self Test Kit on Emergency options

Need them in a hurry?

- Get Next Day Delivery to branch or **direct to site** when you order before 6pm
- Free carriage on all orders over £150
- Need 1 or 100? We can cater for both! Simply place your order before 6pm and we'll dispatch it the very same day

**INTEGRAL MICROWAVE/
DAYLIGHT SENSOR**

**CHOOSE YOUR POWER
SETTING AT INSTALLATION**

**SELF TEST EMERGENCY OR
NON-SELF TEST**

What is STEP Dimming?

STEP Dimming (also referred to as Corridor Function) is a lighting control method and involves the ability to adjust the light output of LED fittings in increments or steps, rather than continuously. Typically, LED lighting with STEP Dimming capabilities allow users to select from predetermined brightness levels, often set at specific percentages of the fitting's full output.

STEP Dimming Settings

Detection Area

50% / 100%

Full Output Hold Time

5s / 5min / 10min / 30min

Standby Fitting Output

10% / 30%

Standby Hold Time

0s / 3min / 10min / infinite

Daylight Threshold

30lux / 50lux / 100lux / disable

Available in

Self Test/Non-Self Test Emergency
